Dustfree silo filling

Optimised operating of a cassette filter

Background knowledge for dedusting technology

Dustfree silo filling

Imagine, cement, sand and gravel would be separately transported to a construction site and mixed laboriously there by hand. A constant mortar quality could not be reached with this „mixture by chance“. . . [...]

Optimised operating of a cassette filter

Infastaub is involved in the manufacturing process of synthetic resins for the automotive industry, CDs and lamp switch boxes with a cassette filter type Infa-Micron MKR. [...]

Background knowledge for dedusting technology

Some knowledge about environmental and dedusting technology is not familiar to laymen. The Infastaub lexicon of dedusting already delivers a lot of knowledge about that. The category is now extended by a glossary and bulk densities. [...]
