### Highlights

Top filter of series INFA-MAT type AM204 are sturdy filter units. They are cleaned mechanically. Cleaning of filter media with the shaking system ensures an effective removal of dust deposits on the filter pocket. Depending on the application, design of the filter is with or without fan. During cleaning, the fan is turned off automatically. Easy access to the filter media is possible because of a maintenance-friendly door. The filter pockets are fastened in a removable filter frame that can be entirely moved in case of filter change.

### Standard design features
