Detailview for term

name of the term: Precoating

descriptions of the term:

Ansaugstrom

Charge of an inert powder into the intake flow. The resulting filter cake can protect the filter medium e. g. against droplets or sticky dusts, that accumulate at the inert filter cake and are separated with it. A precoating can be carried out continously as well as discontinously. In some processe even a single precoating of an unused filter medium is sufficient.
