Filter solutions for your needs

Dedusting plants for dust separation in industrial processes

Many industrial processes cause heavy dust emissions, which can be simply avoided. At the same time numerous regulations and rules regulated the values of dust emissions. Measures for emission reduction have to be taken and the dust load for people and environment has to be kept at a minimum. In some cases the process-related dust separation has to take care for product recovery.

The application of different de-dusting units is depending on the composition of dust, their concentration, the space available and the dimension.

From A as animal feed to Z as zinc smelting: Infastaub has the appropriate filter unit for your branch. We offer a [filtering solution also for your de-dusting](#).
